

## Connecting to Wi-fi Using Macs

1. You must have a Wi-Fi card connected to your Mac in order to access Columbia's Wi-Fi network.
2. When you attempt to browse the internet, you will be prompted to join the local network. Click 'No'.

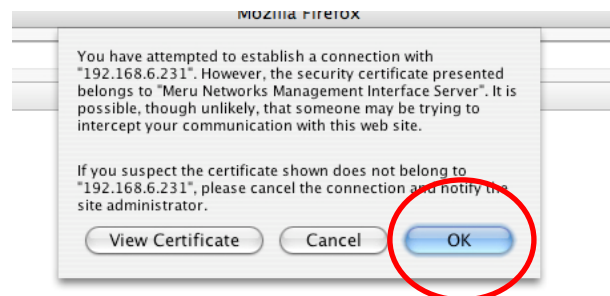

3. On the upper right-hand side of the desktop there is a small icon representing your Wi-Fi connection.

4. Click on this icon and a menu will drop down showing the available connections. Select the connection named 'Columbia.'

5. A verification certificate will pop up. Click 'OK' to accept the certificate.

6. The Login for Web Authentication page will load. Enter your oasis number and password. **Note:** If you recently changed your password, the site may not accept the new password. Please use the previous one if that occurs.
