

Connecting to Wi-fi Using PCs

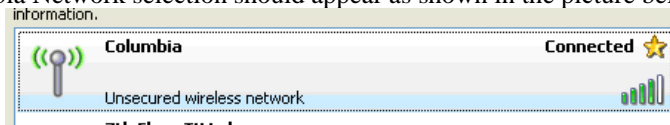

1. You must have a Wi-Fi card connected to your PC in order to access Columbia's Wi-Fi network.
2. When start your computer you will be prompted with the below window. Double-click on the connection named 'Columbia.'

3. The below window will pop up showing your computer connecting to the Columbia network.

4. Once connected, the Columbia Network selection should appear as shown in the picture below.

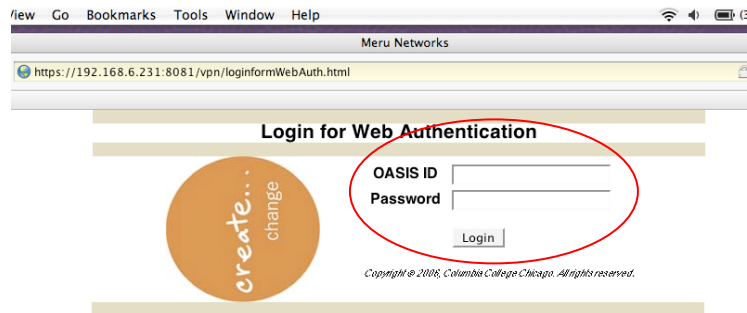

5. Open your internet browser.
6. A verification certificate will pop up. Click 'Yes' to accept the certificate.

Connecting to Wi-fi Using PCs

7. The Login for Web Authentication page will load. Enter your **oasis number** and **password**.

Note: If you recently changed your password, the site may not accept the new password. Please use the previous one if that occurs.
