

Bookstore Textbook Information

"Upon the request of a college bookstore operated by or affiliated with the institution, the institution must make available as soon as practicable the most accurate information available regarding the institution's course schedule for the subsequent academic period; the information provided for students regarding required or recommended textbooks and supplemental materials for each course or class; the number of students enrolled in each course or class; and the maximum student enrollment for each course or class."

STATUS:

The college has designed an automated data transfer from the student information system to the bookstore purchasing system. This data includes all active courses for the appropriate semester, enrollment and maximum enrollment. This data is transferred at least twice per week.

Information regarding required or recommended textbooks and supplemental materials is submitted to the bookstore by academic department staff and individual faculty members. This information is requested by certain dates to allow bookstore proper time to submit orders and to provide students with the maximum value for their used textbooks during peak book buyback periods.
